

Reportable Diseases, Emergency Illnesses and Health Conditions, and Reportable Laboratory Findings Changes for 2019

As required by Conn. Gen. Stat. §19a-2a and Conn. Agencies Regs. §19a-36-A2, the Commissioner of the Department of Public Health (DPH) is required to declare an annual list of Reportable Diseases, Emergency Illnesses and Health Conditions, and Reportable Laboratory Findings. The list of Reportable Diseases, Emergency Illnesses and Health Conditions has two parts: (A) reportable diseases; and (B) reportable emergency illnesses and conditions. An advisory committee, consisting of public health officials, clinicians, and laboratorians, contribute to the process. There is 1 modification to the healthcare provider list only; 2 additions and 5 modifications to the laboratory list only; and 2 additions to both the physician and laboratory lists. No changes have been made to emergency illnesses or health conditions.

Reportable disease forms can be found on the DPH “Forms” webpage at: <https://portal.ct.gov/DPH/Communications/Forms/Forms>.

Changes to the List of Reportable Diseases, Emergency Illnesses and Health Conditions

Part A: Reportable Diseases

HIV—acute cases

Reporting of acute HIV cases has been modified. Acute HIV cases will be reported as Category 1 diseases, which require a telephone call to the DPH immediately on the day of recognition or strong suspicion.

Changes to the List of Reportable Laboratory Findings

Candida spp, blood isolates only

Laboratory reporting of *Candida* species from blood specimens only has been added. Laboratories should submit all *Candida* spp. blood isolates to the State Public Health Laboratory for speciation and antifungal susceptibility testing. Reporting for *Candida auris* remains unchanged; *Candida auris*

from all sites and any potential *Candida auris* misidentifications should still be reported.

Enterotoxigenic Escherichia coli (ETEC)

Laboratory reporting of Enterotoxigenic *E. coli* (ETEC) has been added. This addition will allow DPH to estimate the number of ETEC positive tests typically identified by multiplex PCR GI panels that include ETEC and to conduct follow-up activities.

Group B Streptococcus (GBS)

Laboratory reporting of Group B *Streptococcus* has been modified. Laboratories should submit infant (<1 year of age) GBS isolates to the State Public Health Laboratory.

Hepatitis A

Laboratory reporting of Hepatitis A (HAV) has been modified. Laboratories should report (when available), nucleic acid/RNA test results and total bilirubin level conducted within 7 days of a positive test. These changes will align HAV surveillance with the national HAV case definition.

Hepatitis C

Laboratory reporting of Hepatitis C virus (HCV) has been modified. All labs are required to report HCV genotype results, either by paper or electronically. Laboratories are encouraged to develop policies consistent with CDC guidance for reflex HCV RNA testing following an initial reactive HCV antibody test.

Influenza

Laboratory reporting of influenza has been modified. Laboratories should report positive influenza results to the DPH only. Dual reporting to local health

(Continued on page 4)

REPORTABLE DISEASES, EMERGENCY ILLNESSES and HEALTH CONDITIONS - 2019

PART A: REPORTABLE DISEASES

Physicians, and other professionals are required to report using the Reportable Disease Confidential Case Report form (PD-23), other disease specific form or authorized method (see page 4 for additional information). Forms can be found on the DPH ["Forms" webpage](#) or by calling 860-509-7994. Mailed reports must be sent in envelopes marked "CONFIDENTIAL." Changes for 2019 are in **bold font**.

Category 1 Diseases: Report immediately by telephone (860-509-7994) on the day of recognition or strong suspicion of disease for those diseases marked with a telephone (☎). On evenings, weekends, and holidays call 860-509-8000. These diseases must also be reported by mail within 12 hours.

Category 2 Diseases: All other diseases not marked with a telephone must be reported by mail within 12 hours of recognition or strong suspicion of disease.

--	--	---

FOOTNOTES:

1. Report only to State.
2. As described in the CDC case definition.
3. Includes persons being treated in hyperbaric chambers for suspected CO poisoning.
4. Invasive disease: from sterile fluid (blood, CSF, pericardial, pleural, peritoneal, joint, or vitreous) bone, internal body sites, or other normally sterile site including muscle.
5. Report HAIs according to current CMS pay-for-reporting or pay-for-performance requirements. Detailed instructions on the types of HAIs, facility types and locations, and methods of reporting are available on the DPH website: <https://portal.ct.gov/DPH/Infectious-Diseases/HAI/Healthcare-Associated-Infections-and-Antimicrobial-Resistance>.
6. On request from the DPH and if adequate serum is available, send serum from patients with HUS to the DPH Laboratory for antibody testing.
7. Reporting requirements are satisfied by submitting the Hospitalized and Fatal Cases of Influenza-Case Report Form in a manner specified by the DPH.
8. Clinical sepsis and blood or CSF isolate obtained from an infant ≤ 72 hours of age.
9. Individual cases of "significant unusual illness" are also reportable.
10. Community-acquired: infection present on admission to hospital, and person has no previous hospitalizations or regular contact with the health-care setting.

How to report: The PD-23 is the general disease reporting form and should be used if other specialized forms are not available. The PD-23 can be found on the DPH "Forms" webpage (<https://portal.ct.gov/DPH/Communications/Forms/Forms>). It can also be ordered by writing the Department of Public Health, 410 Capitol Ave., MS#11FDS, P.O. Box 340308, Hartford, CT 06134-0308 or by calling the Epidemiology and Emerging Infections Program (860-509-7994). Specialized reporting forms are available on the DPH ["Forms" webpage](#) or by calling the following programs: Epidemiology and Emerging Infections Program (860-509-7994) - [Hospitalized and Fatal Cases of Influenza](#), Healthcare Associated Infections (860-509-7995) - [National Healthcare Safety Network](#), HIV/AIDS Surveillance (860-509-7900) - [Adult HIV Confidential Case Report form](#), Immunizations Program (860-509-7929) - [Chickenpox Case Report \(Varicella\) form](#), Occupational Health Surveillance Program (860-509-7740) - [Physician's Report of Occupational Disease](#), [Sexually Transmitted Disease Program](#) (860-509-7920), and [Tuberculosis Control Program](#) (860-509-7722). National notifiable disease case definitions are found on the CDC [website](#).

Telephone reports of Category 1 disease should be made to the local Director of Health for the town in which the patient resides, and to the Epidemiology and Emerging Infections Program (860-509-7994). Tuberculosis cases should be directly reported to the Tuberculosis Control Program (860-509-7722). For the name, address, or telephone number of the local Director of Health for a specific town contact the Office of Local Health Administration (860-509-7660).

For public health emergencies on evenings, weekends, and holidays call 860-509-8000.

REPORTABLE LABORATORY FINDINGS—2019

The director of a clinical laboratory must report laboratory evidence suggestive of reportable diseases (see page 4 for additional information). The Laboratory Report of Significant Findings form (OL-15C) can be found on the DPH ["Forms" webpage](#) or by calling 860-509-7994. Changes for 2019 are in **bold font**.

Anaplasma phagocytophilum by PCR only
Babesia: IFA IgM (titer) _____ IgG (titer) _____
 Blood smear PCR Other _____
 microti *divergens* *duncani* Unspciated
Bordetella pertussis (titer) _____
 Culture (1) Non-pertussis *Bordetella* (1) (specify) _____
 DFA PCR
Borrelia burgdorferi (2)
Borrelia miyamotoi
California group virus (3) spp _____
Campylobacter (3) spp _____ Culture PCR EIA
Candida auris (1,4)
***Candida* spp. [blood isolates only]: _____ (1,3)**
Carbapenem-resistant *Acinetobacter baumannii* (CRAB) (1,5)
Carbapenem-resistant Enterobacteriaceae (CRE) (1,3,5)
Genus _____ spp _____
Carboxyhemoglobin \geq 5% _____ % COHb
Chikungunya virus
Chlamydia trachomatis (test type) _____
Clostridium difficile (6)
Corynebacterium diphtheria (1)
Cryptosporidium spp (3) _____ PCR DFA EIA
 Microscopy Other: _____
Cyclospora spp (3) _____ PCR Microscopy Other: _____
Dengue virus
Eastern equine encephalitis virus
Ehrlichia chaffeensis by PCR only
Enterotoxigenic *Escherichia coli* (ETEC) Culture PCR
Escherichia coli O157 (1) Culture PCR
Giardia spp (3) _____
Group A *Streptococcus*, invasive (1,5) Culture Other _____
Group B *Streptococcus*, invasive (1,5) Culture Other _____
Haemophilus ducreyi
Haemophilus influenzae, invasive (1,5) Culture Other _____
Hepatitis A virus (HAV): IgM anti-HAV (7) **NAAT Positive (7)**
ALT _____ **Total Bilirubin** _____ Not Done
Hepatitis B HBsAg Positive Negative (8)
 IgM anti-HBc HBeAg (2) HBV DNA (2)
anti-HBs (8) Positive (titer) _____ Negative
Hepatitis C virus (HCV) (9) **Antibody** _____
 PCR/NAAT/RNA _____ **Genotype specify** _____
Herpes simplex virus (infants \leq 60 days of age)
 Culture PCR IFA Ag detection
HIV Related Testing (report only to the State) (10)
 Detectable Screen (IA)
Antibody Confirmation (WB/IFA/Type-diff) (10)
HIV 1 Positive Neg/Ind HIV 2 Positive Neg/Ind
 HIV NAAT (or qualitative RNA) Detectable Not Detectable
 HIV Viral Load (all results) (10) _____ copies/mL
 HIV genotype (10)
 CD4 count: _____ cells/uL; _____ % (10)
HPV (report only to the State) (11)
Biopsy proven CIN 2 CIN 3 AIS
or their equivalent, (specify) _____
Influenza virus: (**report only to State**) Rapid antigen (2) RT-PCR
 Type A Type B Type Unknown
 Subtype _____
Lead poisoning (blood lead \geq 10 μ g/dL <48 hrs; 0-9 μ g/dL monthly) (12)
 Finger stick level _____ μ g/dL Venous level _____ μ g/dL
Legionella spp _____
 Culture DFA Ag positive
 Four-fold serologic change (titers) _____
Listeria monocytogenes (1) Culture PCR
Mercury poisoning
 Urine \geq 35 μ g/g creatinine _____ μ g/g
 Blood \geq 15 μ g/L _____ μ g/L
Mumps virus (13) (titer) _____ PCR
Mycobacterium leprae
Mycobacterium tuberculosis Related Testing (1)
AFB Smear Positive Negative
If positive Rare Few Numerous
NAAT Positive Negative Indeterminate
Culture *Mycobacterium tuberculosis*
 Non-TB mycobacterium. (specify *M.* _____)
Neisseria gonorrhoeae (test type) _____
Neisseria meningitidis, invasive (1,5)
 Culture Other _____
Neonatal bacterial sepsis (3,14) spp _____
Plasmodium (1,3) spp _____
Poliovirus
Powassan virus
Rabies virus
Rickettsia rickettsii
Rubella virus (13) (titer) _____
Rubeola virus (Measles) (13) (titer) _____ PCR
St. Louis encephalitis virus
Salmonella (1,3) (serogroup & type) _____ Culture PCR
SARS-CoV (1) IgM/IgG
 PCR _____ (specimen) Other _____
Shiga toxin (1) Stx1 Stx2 Type Unknown
 PCR EIA
Shigella (1,3) (serogroup/spp) _____ Culture PCR
Staphylococcus aureus, invasive (5) Culture Other _____
 methicillin-resistant methicillin-sensitive
Staphylococcus aureus, vancomycin MIC \geq 4 μ g/mL (1)
MIC to vancomycin _____ μ g/mL
Staphylococcus epidermidis, vancomycin MIC \geq 32 μ g/mL (1)
MIC to vancomycin _____ μ g/mL
Streptococcus pneumoniae
 Culture (1,5) Urine antigen Other (5) _____
Treponema pallidum RPR (titer) _____ FTA EIA
 VDRL (titer) _____ TPPA
Trichinella
Varicella-zoster virus, acute
 Culture PCR DFA Other _____
Vibrio (1,3) spp _____ Culture PCR
West Nile virus
Yellow fever virus
Yersinia, not *pestis* (1,3) spp _____ Culture PCR
Zika virus
BIOTERRORISM possible disease indicators (15)
Bacillus anthracis (1) *Brucella* spp (1)
Burkholderia mallei (1) *Burkholderia pseudomallei* (1)
Clostridium botulinum *Coxiella burnetii*
Francisella tularensis Ricin
Staphylococcus aureus - enterotoxin B Variola virus (1)
Venezuelan equine encephalitis virus
Viral agents of hemorrhagic fevers *Yersinia pestis* (1)

- Send isolate/specimen to DPH Laboratory. For **GBS**, send isolate for cases <1 year of age. For *Salmonella*, *Shigella*, *Vibrio*, and *Yersinia* (not *pestis*) tested by non-culture methods, send isolate if available; send stool specimen if no isolate available. For Shiga toxin-related disease, send positive broth or stool specimen.
- Only laboratories with electronic file reporting are required to report positive results.
- Specify species/serogroup/serotype.
- Include samples from all sites.
- Sterile site: sterile fluids (blood, CSF, pericardial, pleural, peritoneal, joint, or vitreous), bone, internal body site (lymph node, brain, heart, liver, spleen, kidney, pancreas, or ovary), or other normally sterile site including muscle. For CRE and CRAB, also include urine or sputum; for CRAB also include wounds.
- Upon request from the DPH, report all *C. difficile* positive stool samples.
- Report peak ALT and **Total Bilirubin** results if conducted within one week of HAV positive test, if available. Otherwise, check "Not Done".
- Negative HBsAg and all anti-HBs results only reportable for children \leq 2 years old.
- Report positive Antibody, and all RNA and Genotype results. Negative RNA results only reportable by electronic reporting. For HCV test result reporting, contact (860) 509-7768 for specific form.**
- Report all HIV antibody, antigen, viral load, and qualitative NAAT results. HIV genotype (DNA sequence) and all CD4 results are only reportable by electronic file.
- Upon request from the DPH, send fixed tissue from the diagnostic specimen for HPV typing.
- Report results \geq 10 μ g/dL within 48 hours to the Local Health Department and DPH; submit ALL lead results at least monthly to DPH only.
- Report all IgM positive titers, only report IgG titers considered significant by laboratory performing the test.
- Report all bacterial isolates from blood or CSF from infants \leq 72 hours of age.
- Call the DPH, weekdays 860-509-7994; evenings, weekends, and holidays 860-509-8000.

departments will be facilitated through a shared database (CTEDSS) maintained by DPH.

Yersinia (not pestis)

Laboratory reporting of *Yersinia* (not pestis) has been modified to require submission of *Yersinia* (not pestis) isolates, or stool specimens if no isolate is recovered for positive culture-independent testing results, to the State Public Health Laboratory for confirmation/isolation of the organism.

Changes to Both Lists

Borrelia miyamotoi

Reporting of *Borrelia miyamotoi* has been added. *B. miyamotoi* is an emerging tick-borne pathogen,

which has been identified in *Ixodes scapularis* ticks in Connecticut. State surveillance will assist in characterizing the incidence, epidemiology, and clinical spectrum of *B. miyamotoi* disease in Connecticut.

Powassan virus

Reporting of Powassan virus has been added. Powassan virus is a tick-borne arbovirus, which has been identified in *Ixodes* species ticks and in humans in Connecticut. State surveillance will contribute to national surveillance to better understand the epidemiology of the infection.

Persons Required to Report Reportable Diseases, Emergency Illnesses and Health Conditions

1. Every health care provider who treats or examines any person who has or is suspected to have a reportable disease, emergency illness or health condition shall report the case to the local director of health or other health authority within whose jurisdiction the patient resides and to the Department of Public Health.
2. If the case or suspected case of reportable disease, emergency illness or health condition is in a health care facility, the person in charge of such facility shall ensure that reports are made to the local director of health and Department of Public Health. The person in charge shall designate appropriate infection control or record keeping personnel for this purpose.
3. If the case or suspected case of reportable disease, emergency illness or health condition is not in a health care facility, and if a health care provider is not in attendance or is not known to have made a report within the appropriate time, such report of reportable disease, emergency illness or health condition shall be made to the local director of health or other health authority within whose jurisdiction the patient lives and the Department of Public Health by:
 - A. the administrator serving a public or private school or day care center attended by any person affected or apparently affected with such disease, emergency illness or health condition;
 - B. the person in charge of any camp;
 - C. the master or any other person in charge of any vessel lying within the jurisdiction of the state;
 - D. the master or any other person in charge of any aircraft landing within the jurisdiction of the state;
 - E. the owner or person in charge of any establishment producing, handling, or processing dairy products, other food or non-alcoholic beverages for sale or distribution;
 - F. morticians and funeral directors

Persons Required to Report Reportable Laboratory Findings

The director of a laboratory that receives a primary specimen or sample, which yields a reportable laboratory finding, shall be responsible for reporting such findings within 48 hours to the local director of health of the town in which the affected person normally resides. In the absence of such information, the reports should go to the town from which the specimen originated and to the Department of Public Health.

IMPORTANT NOTICE

Persons required to report must use the Reportable Disease Confidential Case Report Form PD-23 to report Reportable Diseases, Emergency Illnesses and Health Conditions on the current list unless there is a specialized reporting form or other authorized method available. The director of a clinical laboratory must report laboratory evidence suggestive of reportable diseases using the Laboratory Report of Significant Findings Form OL-15C or other approved format by the DPH. Reporting forms can be found on the DPH “Forms” webpage: (<https://portal.ct.gov/DPH/Communications/Forms/Forms>) or by calling 860-509-7994. Please follow these guidelines when submitting reports:

- Mailed documents must have “CONFIDENTIAL” marked on the envelope.
- All required information on the form must be completed, including name, address, and phone number of person reporting and healthcare provider, infectious agent, test method, date of onset of illness, and name, address, date of birth, race, ethnicity, gender, and occupation of patient.
- Send one copy of completed report to the DPH via fax (860-509-7910), or mail to: Connecticut Department of Public Health, 410 Capitol Ave., MS#11FDS, P.O. Box 340308, Hartford, CT 06134-0308.
- Unless otherwise noted, send one copy of the completed report to the Director of Health of the patient’s town of residence.
- Keep a copy in the patient’s medical record.
